The collection guides are preparing unique procedures that will reflect this generic outline:  
 Context: Meet those gathered and discover the concerns and hopes each person brings related to this collection.

Part I: Review collection intention and what is going on in the world today with current challenges, climate change and the virus.

Part II: Recall what we learned in the past and discern how website can share relevant learnings.

Part III: So what? Dialogue about new perspectives, resolves, potential actions.

Reflection: Session summary and reminder of next collection dialogue.

\*\*\*\*\*

Bear with us as we learn how to virtually gather and dialogue together. Our team is testing the Google Meet platform, allowing up to 200 to participate. We intend to record each dialogue and have a notetaker. In conversation with Larry Philbrook, he enthusiastically

agreed to host follow-up session(s) this summer to build on the May meeting and engage people on the other side of the world - truly making this a global research assembling.

If you are interested in participating in the collection dialogues,

- (1) Review the archives website (<https://icaglobalarchives.org>), to identify your passion and interests;
- (2) Go to Google and sign up for a gmail address (Open Google, click on circle with letter of your name in upper right corner, next to nine dots - add new email under manage accounts);
- (3) **Register by emailing Lynda Cock** ([lyndacock@gmail.com](mailto:lyndacock@gmail.com)), telling her which collection(s) you are interested in participating in. Instruction on how to connect to Google Meet will come with your registration confirmation.

Peace, **The Social Research Center Team**
